# Welding flange, rotatable

Illustration only

**Welding flange, rotatable, with metric thread, stainless steel 304L, DN 250 CF, 2 mm**

## Dimensions

| Technical Data                  | Welding flange, rotatable, with metric thread, stainless steel 304L, DN 250 CF, 2 mm |
|---------------------------------|--------------------------------------------------------------------------------------|
| Materials in contact with media | Stainless steel (AISI 304L)                                                          |
| Number of screws                | 32 Pieces                                                                            |
| Pipe dimension                  | 254 mm × 2 mm                                                                        |
| Thread                          | M 8                                                                                  |
| Temperature range               | 196 – 300 °C                                                                         |
| Connection flange               | DN 250 CF                                                                            |
| Pressure range                  | 1 · 10 <sup>-12</sup> hPa – to ambient pressure                                      |
| Temperature range max.          | 300 °C   572 °F   573.15 K                                                           |
| Temperature range min.          | 196 °C   320.8 °F   77.15 K                                                          |

| Order number                                                                         | Welding flange, rotatable, with metric thread, stainless steel 304L, DN 250 CF, 2 mm |
|--------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------|
| Welding flange, rotatable, with metric thread, stainless steel 304L, DN 250 CF, 2 mm | 420FAD250-254-G                                                                      |
