

# ISO-K-Blank flange for ports, stainless steel 304/1.4301, DN 200 ISO- K

---

# ISO-K-Blank flange for ports

ISO-K-Blank flange for ports, stainless steel  
304/1.4301, DN 200 ISO-K

## Technical Data

| ISO-K-Blank flange for ports, stainless steel<br>304/1.4301, DN 200 ISO-K |                                                                                                    |
|---------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------|
| Materials in contact with media                                           | Stainless steel 1.4301 (AISI 304)                                                                  |
| O-ring material                                                           | FKM                                                                                                |
| Temperature range                                                         | -196 – 300 °C                                                                                      |
| Connection flange                                                         | DN 200 ISO-K                                                                                       |
| Pressure range                                                            | < 1E-7 hPa – 5E2 hPa over pressure (elastomer seal); 1E-9 hPa – 5E2 hPa over pressure (metal seal) |
| Temperature range max.                                                    | 300 °C   572 °F   573.15 K                                                                         |
| Temperature range min.                                                    | -196 °C   -320.8 °F   77.15 K                                                                      |

## Order number
